PROFESSIONAL SUMMARY

Junior Full Stack Developer and Computer Science student with hands-on experience building corporate web systems in JavaScript, HTML, CSS, Firebase/Firestore, and Git. Bringing over 10 years of experience in administrative routines, customer service, structured processes, strict deadlines, and document compliance to build practical, organized, and business-focused software solutions.

FEATURED SOFTWARE PROJECTS

Gestor de Processos | In Production (teste-gestor.ajsmtech.com)

- Built the complete application end-to-end (front-end, Cloud Functions, Firestore schema, and security rules).
- **Metrics & Impact:** In daily production with **15 to 20 users**, managing ~100 new contracts/month and a database of 10,000+ clients (~1,000 monthly credit analyses).
- Replaced manual spreadsheets with an audit-proof workflow providing precise deadline tracking and management performance reports.
- Integrated with WhatsApp Business API and Vertex AI for intelligent document reading support.

AI Agent - Credit Analyst | Active — Async Agent API

- Decoupled Node.js API with Express 5 and BullMQ + Redis queues for processing document verification sent via WhatsApp.
- Meta Cloud API webhook with HMAC signature validation (X-Hub-Signature-256) and instant response.
- Persisted human feedback loop feeding few-shot prompt examples for subsequent runs, plus structured logging with Pino.

Ethos Tribo | In Development — Monorepo Web + Mobile (ethos-tribo-web.vercel.app)

- TypeScript monorepo with 2 apps (Next.js 16 and React Native/Expo) and 5 shared packages (contracts, domain, data, design, storage).
- 520+ automated tests, geospatial proximity search powered by PostGIS, and 100% type-safe tRPC + Zod contracts.

CraftWebTools | Live — Browser-First Processing (craftwebtools.com)

- PDF manipulation toolsuite (12+ tools) processing 100% client-side with pdf-lib, pdfjs-dist, and WebAssembly for zero data leakage.

PROFESSIONAL EXPERIENCE

Credit Analyst | Apoio Administrativo (Dec 2021 — Jun 2026)

- Responsible for contract registration, document auditing, deadline enforcement, and legal compliance.
- Identified manual spreadsheet bottlenecks and designed Gestor de Processos to replace them — now in daily production with 15-20 operators managing ~1,000 credit analyses and ~100 contracts/month.
- Developed the application end-to-end: requirement discovery with end users, Firestore data architecture, Cloud Functions, automation, and executive dashboards.
- Built an AI Agent API with async queues (BullMQ/Redis) to accelerate document verification under human supervision.
- Maintained strict compliance with banking standards, LGPD data privacy, and critical deadlines.

Administrative Assistant | Premiere Serviços Administrativos (Mar 2014 — Dec 2021)

- Customer support, assembly, verification, and tracking of complex real estate financing files.
- Direct liaison with banks, public registries, and government agencies, enforcing strict document verification, deadline control, and process status.
- Data organization, resolution of operational inconsistencies, and office routine support — the foundation of discipline applied in software engineering.

EDUCATION

- **B.Sc. in Computer Science** — Faculdade Descomplica (Since Mar 2025 · In progress)
- **High School Diploma** — Colégio Estadual Arlindo Carvalho de Amorim

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3.
- **Front-end:** React 19, Next.js (App Router), React Native / Expo, Vite, Tailwind CSS, Design Tokens, WCAG Accessibility.
- **Back-end & APIs:** Node.js, Express, tRPC, REST APIs, Zod, BullMQ, Redis, Cloud Functions, Webhooks, HMAC.
- **Data & ORMs:** PostgreSQL, PostGIS, Prisma, Supabase, Firestore, SQL, Data Modeling & Indexing.
- **Engineering & DevOps:** Git, GitHub, Docker, Vitest, Automated Testing, ADRs, Netlify, Vercel, Firebase, LGPD.
